- Polish – native
- English – B2 certified

I hereby give consent for my personal  
data included in my application to be  
processed for the purposes of the  
recruitment process.

# HUBERT WAJDA

## ABOUT ME

I am a highly motivated and ambitious student with a strong passion for programming, constantly learning and growing every day. I enjoy taking on challenges and collaborating effectively within a team. In my free time, I compete professionally in table tennis, playing in the 2nd league for the club AZS AWFIS Balta Gdansk.

## PROJECTS

### TTT – TournamentsTableTennisWeb

Spring, React.js, Bootstrap, MySQL, Docker

Developed a full-stack web application for managing table tennis tournaments, featuring real-time updates via WebSocket technology. The application supports user authentication (JWT), role-based access control, and CRUD operations. Implemented a Single-Elimination tournament system with player seeding using the Serpentine System. Utilized MySQL, Hibernate, Flyway, and SendGrid for email services. Designed a responsive UI with Bootstrap and MUI, and ensured form validation with Formik/Yup. Deployed using Docker for seamless setup and scalability.

<https://github.com/WajHub/TournamentsTableTennisWeb>

### TERMINAL – in progress

React.js, Typescript, TailwindCss, HeadlessUI, Scrum

Currently developing the frontend for a lab data management app in a three-member team, enabling scientists to manage samples performed by researchers. Working in SCRUM to deliver a responsive and user-friendly interface using TailwindCss and HeadlessUI. Implementing advanced data table functionalities with Tanstack Table and managing data fetching and state with Tanstack Query to ensure optimal performance and usability. The project is still in progress, with ongoing improvements and feature enhancements
